Subject: FS update and proposed plan

Hi Jay,

I wanted to provide an update on the FS and the proposed plan.

We had a call with PPG late last week on the FS. PPG has some serious concerns over the statements regarding site related contamination and certain statement they believe were not factual. We asked that they focus their concerns on those issues and provide a response. We will review and make the appropriate changes. I don't think this issue overlaps with concerns that NJDEP has raised in the past but I will keep you updated and let you know if we need to have a call. PPG should be responding today.

For the proposed plan, we have a draft prepared and it is under review by our management. The dates are somewhat in flux right now but we expect to have a draft ready to send to NDJEP by early next week. We will be publishing the proposed plan mid to late July. From what I understand, NJDEP does not need respond before the plan is published. However, due to the pace we are going it would be good to have NJDEP's response one month after we send you the proposed plan. So approximately August 7th (assuming we don't run into any hiccups next week).

Let me know if you have any questions.

Thanks,

Josh
